

EZEEDOS

Simply POS

Now with built-in loyalty

eZeePos Software

eZeePos our 'on premise' Point of Sale software solution has been fully developed and painstakingly tested alongside brand leading Point of Sale hardware to ensure 100% compatibility, leading to reassuring high levels of reliability required in the hospitality industry.

Our solution is simple to setup and a breeze to use and offers all the key features required for all sectors of the hospitality industry.

In addition to our 'On Premise' front end solution, every customer has access to eZeePos Office our SAAS cloud based back office solution which offers a higher tier of management reporting as well as system management from a central point. eZeePos Office works across any operating platform with a web browser application.

Whether you are managing one or many locations, eZeePos Office provides you with the flexibility to view management reports at your leisure. Highlight real-time trading information, monitor areas such as operator errors and refunds which assists in reducing shrinkage or indeed add/update product prices real time.

Recipe nesting, profitability reporting and stock inventory are all part of the rich features that eZeePos Office offers. As an SAAS cloud solution, eZeePos Office is always up to date. No need for costly & time consuming updates it is all part of the system solution.

“eZeePos POS offers a simple user interface increasing speed and efficiency which instils customer confidence.”

System Integration

Moving to a new POS solution can be a daunting experience taking up valuable management and staff time. Buying your solution online with no 'On the Ground' help can lead to core installation and setup issues that can inevitably result in system failure.

Our team of system provider's take away this pain ensuring the initial installation and setup is carried out professionally and is bespoke to your business operation.

Full testing is carried out on premise ensuring core networking and system infrastructure is configured specifically to your requirements

A new POS system can be stressful for staff members that's why our training takes place in your premises where staff members are more relaxed in an environment they are familiar with.

Ongoing support is part of the whole package offered by Samtouch System Provider's.

Whether you are looking for advice over the telephone, remote access to your system or a site visit from our local System Providers you can rest assured that on-going support is only a telephone call away.

Why eZeePos?

- Robust and feature rich solution developed and supported by POS businesses who know the hospitality industry.
- We offer an end to end solution from hardware to software which ensures complete harmonisation on every aspect of your new POS solution.
- Complete on-site system installation, testing and training. Ensuring management and staff are 100% confident in system operation.
- On-going system support and 'hand holding' from one of our qualified system providers.
- Nationwide coverage via our reseller network.

Compatibility

Tried, tested & fully compatible with iMin Hardware.

Experience

Knowledge of POS & Hospitality industry.

Nationwide

We cover the whole of the UK via our reseller network.

Cost Effective

An affordable solution with a quick return on investment.

Simple to Use

Our solution is so easy to use, that staff members can be fully trained in less than 20 minutes. Although the solution is one of the most feature rich POS solutions in the industry, providing a wealth of management reports, its designed to reduce shrinkage.

The user interface is so easy to use new staff members can be up and running in no time at all. Our system delivers fast clerk lay-away or tab operation across multiple terminals as well as easy to use table management, split billing and fast tendering.

With lead thru operation prompting cooking instruction, up selling or cross selling features you can rest assured that the operation is kept simple for the operator but provides every opportunity to increase average transaction value.

Ongoing system maintenance, including product changes, menu changes or screen changes can be completed either on the POS terminal or via our cloud based solution eZeePos Office.

Monitoring stock shortage or identifying staff error notification is only a small part of the cloud based back office solution. With a wealth of management reports available at the touch of a button, eZeePos Office offers an easy to use back office solution cutting down mundane tasks.

Easy Training

The user interface is simple & intuitive making system operation simple.

Speeds Up Operation

A well-designed system, speeds up operation & reduces shrinkage and waste.

Customer Satisfaction

Professional, quick & accurate service leads to customer confidence.

EZEPOS

Key Features

HOSPITALITY

Floating Operators & Tabs

As part of a multi-POS operation, it is important that operator's can move around a system easily. With eZeePos any operator can start a Sale/Tab on one terminal and add to or finalise the sale on another terminal reducing bottle necks and speeding up service.

Operators can quickly move a tab to a Table/- Check anywhere in the system ensuring no transactions are lost. Operator accountability is crucial to the smooth running of your business.

eZeePos POS and eZeePos Office provide a high level of management reporting available for each operator.

Whether you are reconciling each operator individually or tracking sales performance at either product level or category level, eZeePos provides easily readable reports to analyse your operators performance.

eZeePos Office also displays Pop-Up notifications on the dashboard if your operator carries out an operation that you want notifications on. For example: voids & refunds or any other areas that may be susceptible to abuse.

“Operators can quickly move a tab to a Table/Check anywhere in the system ensuring no transactions are lost.”

Unlimited Operators
Unlimited operators can be added to your point of sale system.

Unlimited Table
There are no limits to the number of tables, checks or Tabs .

Reporting
Full reconciliation and sales reporting is available per operator.

Synchronise Transaction
Operator sales are synchronised throughout the system.

Dynamic Screen Setup

Adding new products or specials to a touch screen system can be tedious. First creating the product information and then assigning it to the relevant screen.

We understand how time consuming this can be so have 'lightened the load'. With the eZeePos 'Dynamic Screen' feature all you need to do is create the product, assign it to a category. i.e. Starters, Mains, Desserts etc. and eZeePos will do the rest.

Products can be assigned to different categories, so they can appear on different category screens. For example an item maybe sold as a starter or a menu course or also feature on a specials board.

The drop down category selection at the top of the screen is so easy to use and operate. Sales Orders can be completed in a matter of seconds with the fast refresh speed of the iMin Android terminals.

For multi-terminal sites it makes sense to standardise the configuration throughout the business. With terminals' carrying out different functions such as bar or front desk operation, It's simple to tailor a terminal to it's actual function.

“With the eZeePos ‘Dynamic Screen’ feature all you need to do is create the product, assign it to a category.”

Quick & Easy Product Creation
Adding new products is simple with eZeePos.

Fast Operation
Optimised for quick performance on Microsoft latest operating systems.

Vivid Definition
Utilising the quality PCT touchscreen offering high definition fast refresh performance.

Best Practise Interface
Designed by people who know the industry offering best practise system operations.

Remote Services

To further enhance efficiency and increase service accuracy and adopt best practice operations within your establishment, eZeePos Software offers a range of remote services.

Utilising iMin handheld devices, operation at the table, speeds up service and dramatically reduces wrong orders, enhancing customer experience. What's more the software operation on the held held device is an exact extension of the fixed terminal operation, so operators don't require further training to use the table ordering solution.

Remote order printing to the bar prep areas and kitchen service areas again improve accuracy, speed up service again leading to a better experience for the customer.

For fast food operations, kitchen order monitors can offer a more efficient and cost-effective solution to kitchen order printers.

Used by many of the big fast food chains kitchen order monitors display on going orders as well as a snap shot of the meals that need preparing real-time.

“Utilising tablet operation at the table, speeds up service and dramatically reduces wrong orders, enhancing customer experience.”

Best Practise Operations

Designed for the hospitality industry to instil best practise operations.

Accurate Order Processing

Lead through options to ensure the right questions are been asked during order taking.

Faster Table Turnaround

Orders instantly processed through to the kitchen for faster food prep.

Improved Customer Experience

Faster order processing, less mistakes in food delivery and accurate billing.

Promotions

A large part of the hospitality business is about offering a range of promotions to entice customers.

The eZeePos solution facilitates definable promotions and discounts that are easy setup either within eZeePos or on eZeePos Office. These wide range of promotion options allows management to easily incentivise and influence customers spending trends.

Promotions can be actively monitored, allowing management to easily adapt promotions for maximum benefit. Whether you are looking to implement a simple 3 for 2 deal or a range of complex promotions, eZeePos has the capacity to deal with a wide range of promotional algorithms.

Unlimited number of promotions can be preset within eZeePos allowing you to keep promotions up to date and exciting to the customers.

In addition, price changes can be scheduled to be updated on a certain date and time.

“eZeePos has the capacity to deal with a wide range of promotional algorithms.”

Wide Range Promotional Options

We offer a wide range of promotional algorithms built into eZeePos.

Easy Implementations

Promotions can sometimes be quite complex but are easily created in eZeePos.

Incentivise Customers

Promotions can influence and incentivise customers spending.

Time Activated

Promotions can be activated on different days or time of day.

Food Allergens

As a food business, you must follow the allergen information rules set in EU Food Information for Consumers Regulation (EU FIC). This means that you must:

Provide allergen information to the consumer for both pre-packed and non-prepacked food or drink handle and manage food allergens adequately.

You need to tell your customers if any food products you sell or provide contain any of the main 14 allergens as an ingredient.

- Celery.
- Cereals containing Gluten – including Wheat (such as Spelt and Khorasan), Rye, Barley & Oats.
- Crustaceans – such as Prawns, Crabs & Lobsters.
- Eggs.
- Fish.
- Milk.
- Molluscs – such as Mussels and Oysters.
- Tree Nuts – including Almonds, Hazelnuts, Walnuts, Brazil Nuts, Cashews, Pecans, Pistachios and Macadamia Nuts.

- Mustard.
- Peanuts.
- Sesame Seeds.
- Soybeans.
- Sulphur Dioxide and Sulphites (if they are at a concentration of more than ten parts per million).

“Provide allergen information to the consumer for both pre-packed and non-prepacked food.”

Information Quickly
Provide customer with relevant product information quickly.

EU Food Regulations
Assists in meeting current regulatory food guide lines.

Products Management
Easily maintain product information through eZeePos Back Office.

Paper Records
No more paper records at the front desk.

Product Sizes

eZeePos offers up to 3 different size levels per product. These can be used in many different scenarios typically, Small, Med, Large with different price points

In addition, to size selection we can also add things like cooking instructions, variation in product and added extras.

As an example a burger may come in two sizes, Single or Double. The burger bun may have a number of selections:- Seeded, White, Brown etc. The we can add or remove selections such as Add Ketchup, No lettuce and so on. There maybe a selection for other extras such as Chips

The advantages of lead thru operation is firstly to prompt the operator to ask about extras potentially increasing average sales value, Secondly, to ensure that the food is prepared to the customers exact requirements, leading to a greater level of customer satisfaction.

Any cooking instructions are then automatically sent through the the Kitchen Order Video screen, so chef has an exact knowledge of the customers requirements.

“eZeePos software offers lead thru products orders.”

Size Levels

Up to 3 Different Price Levels Per Product.

Cooking Instructions

Lead thru sales prompt operator to ask questions

Add Extra

Lead thru sales, prompts the operator to ask about extras

Customer Satisfaction

Food prepared to the customer exact requirements leads to greater customer satisfaction

Report Dashboard.

The end of day report available on the terminal is easy to read and informative.

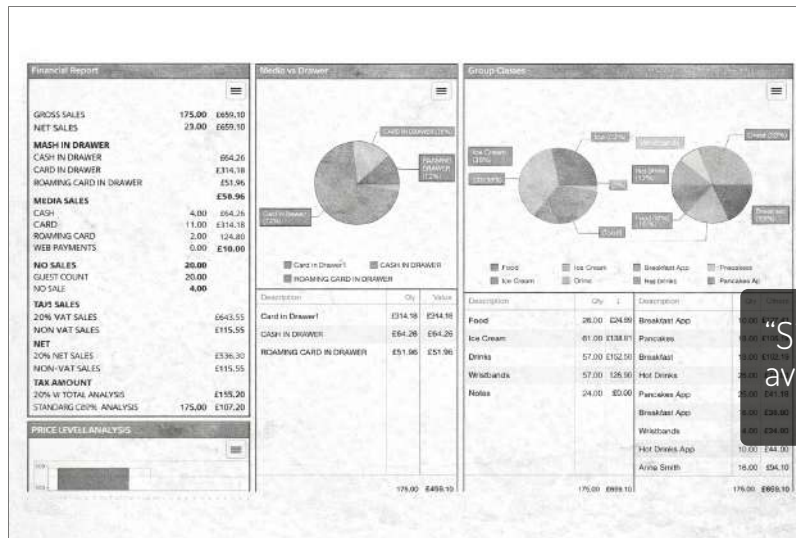

In addition you can refer back to the same day last week and the previous day.

The end of day information is very simply illustrated with key analytics in graphical format.

Information can be reported on a selected day or consolidated information from all terminals at the premises.

Information such as total sale, sales by time period, sales by operator and information such as sales by groups.

A wealth of indepth reports is also available from eZeePos back-office which is supplied as part of the ecosystem

“Simple, easy to read reports available at anytime”

Graphic Report
Simple to read analytics with key indicators to performance at the drop of a hat

Comparisons
Compare sales across different days easily with the report dashboard

InDepth Reports
For indepth & detailed reporting this is available via the eZeePos Cloud Back Office

Integrated Payments

Lets your card machine and till talk to each other for simpler sales - and we're the only ones offering it at no additional cost.

Strength In Numbers

What do you get when you combine the power of 70,000 small businesses? We use our size to negotiate with banks.

EZEPOS Additions

HOSPITALITY

eZeePos Kitchen / Collection Point

Transform the way orders are handled in the kitchen using the latest technology from eZeePos. When orders are taken front of house, order tickets are transferred to a touch screen terminal located in each preparation area.

Each order is shown as an individual ticket with information such as Table#, Guests, Time Taken, Collection Time. A summary of all the items that need to be prepared are consolidated on the screen so chef can see at a glance what needs to be prep'd.

No more lost tickets; digital tickets go a long way to reducing litter in the kitchen as well as helping the hospitality environment and cutting costs in paper rolls too.

Just in case an order has been missed alert times can be pre-set in the system to advise chef that an order has not gone. All in all, eZeePos Kitchen offers a range of features to speed up operation,

minimise wastage and reduce stress levels in the kitchen.

Collection point - As orders are completed in the kitchen the counter service screen will display which orders are ready for collection.

NOW WITH
COLLECTION
POINT

A comprehensive list of all the orders recieved but yet to be prepared.

Pinned Orders
See the status of current orders being prepared whilst 'pinned'.

Just In Case
Alert times can be pre-set in the system to advise chef that an order has not gone.

Unpinned Orders
'Unpin' orders once the order is prepared and ready for collection or delivery.

eZeePos - Orderkiosk

Orderkiosk is a cutting-edge solution designed to revolutionize the way businesses in the hospitality, contract catering, and healthcare industries operate. By offering a cashless environment, this innovative system enables customers to place orders and make payments independently through an interactive touchscreen menu.

This not only enhances the overall customer experience but also helps businesses increase order numbers and basket values effortlessly. With SelfService, businesses can streamline their processes, reduce wait times, and improve operational efficiency.

The interactive touchscreen menu provided by **Orderkiosk** is user-friendly and intuitive, making it easy for customers to navigate and place their orders without the need for assistance from staff members. This not only empowers customers to make decisions at their own pace but also frees up staff to focus on other important tasks, ultimately leading to a more efficient and productive work environment.

Additionally, the cashless payment system eliminates the need for handling physical cash, reducing the risk of errors and theft while providing a more secure transaction process for both customers and businesses.

By implementing **Orderkiosk** in your business, you can stay ahead of the competition and meet the evolving needs of your customers in today's fast-paced world. Whether you run a restaurant, contract catering, theme park, or healthcare facility, this innovative solution can help you enhance customer satisfaction, increase sales, and drive business growth. With **Orderkiosk**, you can create a seamless and convenient ordering and payment experience that will leave a lasting impression on your customers and set your business apart from the rest.

Security & Recovery

eZeePos Office our 'software as a service' back office solution is hosted on one of the most secure infrastructures worldwide. Security is integrated into every aspect of Microsoft Azure.

This powerful combination helps protect your applications and data, support your compliance efforts, and provide cost-effective security for organizations of all sizes.

As part of eZeePos Office we 'snapshot' a copy of your local POS solution. In the event of hardware failure we are able to restore the POS terminal to its last known restore point for quick system recovery.

This service is provided as a fail-safe system recovery for our support team and is not a substitute for your own backup processes.

- **Security** – Hosted on one of the most secure networks worldwide.
- **Restore Point** – We snapshot a copy of your POS system for backup recovery.

- **Performance** – Azure is a scalable solution that automatically increases resources as required.
- **Updates** – System updates are added seamlessly without any intervention from the user.

In the event of hardware failure we are able to restore the POS terminal to its last known restore point for quick system recovery.

Microsoft Azure
Azure offers you unique security advantages derived from global security intelligence.

Business Snapshot
In the event of hardware failure we are able to restore the POS terminal to its last known restore point.

Scalable Solution
Microsoft Azure is a scalable solution that automatically increases resources as required.

The utilisation of cloud technologies means your system is always up to date.

Product Management

In the hospitality industry we have found that there are a wide range of requirements from the EPOS solution in relation to product management.

Whether you are creating recipes, product modifiers or promotions your system has to work with you and offer an easy interface to execute the required features.

With eZeePos and our back-office solution e Office product maintenance couldn't be simpler. The information we hold about each product is comprehensive, however we have managed to represent this on one easy to read product screen.

Whether your business operates a range of price levels, product sizes, loyalty points or a range of kitchen order printer's the product maintenance screen is simple to follow and update.

Whenever a product is updated it is seamlessly posted around the network so instantly your products

are updated. Alternatively, you can schedule updates that will take place automatically.

Maybe you have a special event or price update pending, leave eZeePos Office to update your system automatically.
